

SiSiB[®] PC7520 SILANE

- 1 -

CHEMICAL NAME

Methylvinylidi(cyclohexanoneoxime)silane [Customized]

CHEMICAL STRUCTURE

INTRODUCTION

SiSiB[®] PC7520 is a clear and almost colorless fluid. It readily hydrolyzes upon contact with moisture.

TYPICAL PHYSICAL PROPERTIES

CAS No.	N/A
EINECS No.	N/A
Formula	C ₁₅ H ₂₆ N ₂ O ₂ Si
Molecular Weight	294.46
Boiling Point	No data °C [760mmHg]
Flash Point	No data °C
Color and Appearance	Colorless or yellowish transparent liquid
Density _{25/25°C}	No data
Refractive Index	No data
Active Content	95.0% by GC

APPLICATIONS

SiSiB[®] PC7520 is used as a neutral curing agent in silicone sealant formulations. Generally, this silane is used for crosslinking silanol-terminated polydimethylsiloxane in the presence of atmospheric moisture.

PACKING AND STORAGE

Customized product packing is 100ml, 250ml, 500ml, 1L and 5L bottle. Industrialized product packing is 210L steel drum or 1000L IBC tote.

In the unopened original container SiSiB® PC7520 has a shelf life of one year in a dry and cool place.

NOTES

All information in the leaflet is based on our present knowledge and experience. We reserve the right to make any changes according to technological progress or further developments. Performance of the product described herein should be verified by testing.

We specifically disclaim any other express or implied warranty of fitness for a particular purpose or merchantability. We disclaim liability for any incidental or consequential damages.

Please send all technical questions concerning quality and product safety to: silanes@SiSiB.com.
